

# AmritChidiya — Overview & Quick Start

**■ AmritChidiya (■■■■■■■■■■)**

**"Apni Sone Ki Chidiya Ko Phir Se Udaan Do" ■■**

AmritChidiya is a full-stack, AI-powered voice and chat assistant that connects Indian citizens with government schemes, scholarships, and welfare benefits in **5 major Indian languages** (Hindi, Hinglish, English, Marathi, and Tamil).

...

## ■ Complete Project Documentation & Team Division

Detailed project guides have been created in the main directory:

- **PROJECT DOCUMENTATION.md** — Comprehensive architecture guide, core feature breakdown, step-by-step system execution flow, technology stack, and installation guide.
- **TEAM ROLES DIVISION.md** — Structured project breakdown divided across **4 team member roles** (Frontend UI/UX Lead, Backend API & Speech Lead, AI Agent & Scheme Logic Lead, DB/Auth & DevOps Lead).

— — —

## ■ Quick Feature Highlights

- **■ Multilingual Conversational AI:** Native support for Hindi, Hinglish, English, Marathi, and Tamil.
- **■ Hands-Free Talk Mode:** Groq Whisper Large v3 speech recognition & Edge-TTS neural voice synthesis.
- **■ Scheme Eligibility Matcher:** Matches user profile (age, state, income, caste category, marks) with 100% eligible government schemes.
- **■ Hyperlinked Official Portals:** Scheme matches feature direct hyperlinks to official application sites ([scholarships.gov.in](https://scholarships.gov.in), [scholarship.up.gov.in](https://scholarship.up.gov.in), [pmkisan.gov.in](https://pmkisan.gov.in), [myscheme.gov.in](https://myscheme.gov.in)).
- **■ Step-by-Step Registration Assistance:** Interactive 5-step registration breakdown with required document checklists.
- **■ User Auth & Chat History:** SQLite database backed account creation and cross-device chat sync.

— — —

## ■ ■ Technology Stack

- **Frontend:** Next.js 16 (App Router), React 19, TypeScript, Tailwind CSS, Lucide Icons, ReactMarkdown
- **Backend:** FastAPI (Python), LangGraph, LangChain, Groq LLM (Qwen 3.8 27B / GPT-OSS)
- **Speech & Audio:** Groq Whisper Large v3 (STT), Edge-TTS (Neural Voice Synthesis)
- **Database:** SQLite3 (SHA-256 Auth & JSON Chat Turns Storage)

## ■ Quick Start Guide

## Backend Server

```
cd backend
python -m venv .venv
source .venv/bin/activate # On Windows: .venv\Scripts\activate
pip install -r requirements.txt
python main.py
```

## Frontend Application

```
cd frontend
npm install
npm run dev
```

Open <http://localhost:3000> in your browser.
